### Scheme Description

ScotiaBRIDGE ("the Scheme") is an Approved Retirement Scheme recognized under the Pensions (Superannuation Funds and Retirement Schemes) Act, 2004. The Scheme enables Members to accumulate tax-deductible contributions during their working years and invest them until retirement.

### Asset Allocation

The Scheme's assets are invested primarily in ScotiaBRIDGE Income and Growth Fund ("the Fund"). The Fund is largely comprised of Fixed Income, Equities and Money Market securities. See pie chart on the right for details.

### Investment Objective

The Scheme seeks to ensure growth in the unit value and long-term capital appreciation, to provide pension income to Members on retirement.

### Fund Managers

The Scheme's assets are held in Trust for its Members. The Scheme's performance is monitored by the Trustees on the Members' behalf. The Scheme's Investment Manager is Scotia Investments Jamaica Limited (SIJL), a professional investment and portfolio management firm that actively manages the portfolio, guided by the Trustees. The Scheme's Administrator is Scotia Jamaica Life Insurance Company (SJLIC).

### Scheme Performance

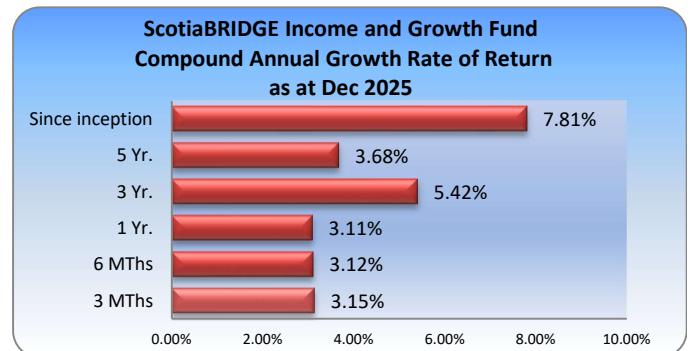

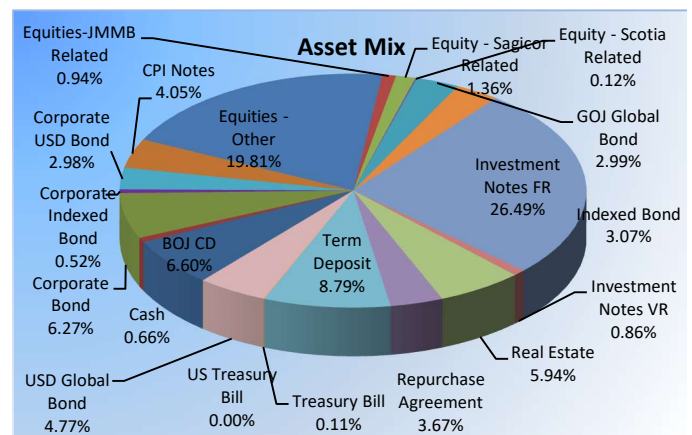

The rate of return year-to-date (YTD) as at December 2025 was **3.11%** pa. The inflation out-turn for the period was **4.53%** pa, resulting in a real return of **-1.42%** pa. See bar chart on the right.

The Fund's return was driven mainly by the Money Market, Fixed Income and Real Estate asset classes, which offset the negative turn of the Equities portfolio. Despite the negative return, the equities portfolio outperformed the JSE's Main Market Index due to the Investment Manager's selection of stocks. The Fixed Income portfolio's return was driven by interest earned and positive price movements on the portfolio's holdings. USD appreciation also positively contributed to the return of the Fund's USD-denominated securities. The Money Market segment's outturn was driven by aggressive bidding on government securities and maximization of invested yields investment yields. The outperformance of the Real Estate portfolio relative to the benchmark was driven by lease income as well as the upward movement of real estate unit trust holdings.
