

iProtect

**This is how you should live**

Your home controlled by you

Powered by  **GUARDSMAN**

**The Guardsman Group** has launched a new Smart Home & Business Security company called iProtect.

At **iProtect**, we believe that the power to protect your home, business and loved ones should be in the palm of your hands. This is why we put the power of protection at your fingertips by giving you smart security solutions you can control from anywhere, anytime. Get remote access to security sensors, cameras and other home security devices like smart lights, locks and appliances conveniently through our simple mobile app.

Enjoy the ultimate protection that safeguards your home with a 24/7/365 monitoring station and Armed Response team so you get the best rapid armed response to your alerts.

For us, the definition of security is one that will not only keep your doors and windows safe against break-ins but also protect you from fires, floods and even high energy and water bills. We provide smoke, flood and water leak sensors while giving you the control to turn devices on and off remotely. What's even better is that this system is wireless so no need to worry about ugly wires.

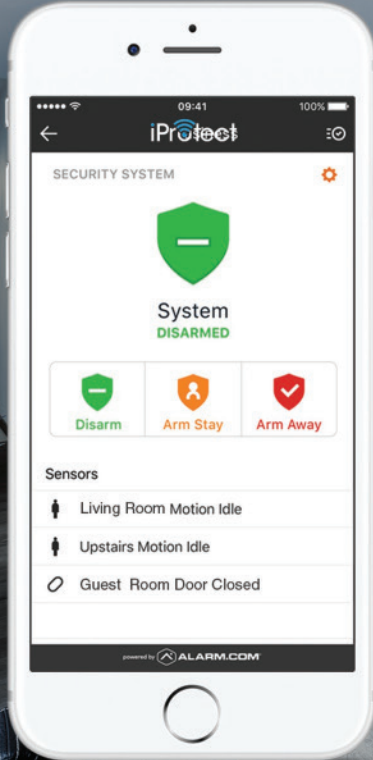

It's time you have peace of mind, let us do that for you.

**iProtect**

# Smart Security at your fingertips

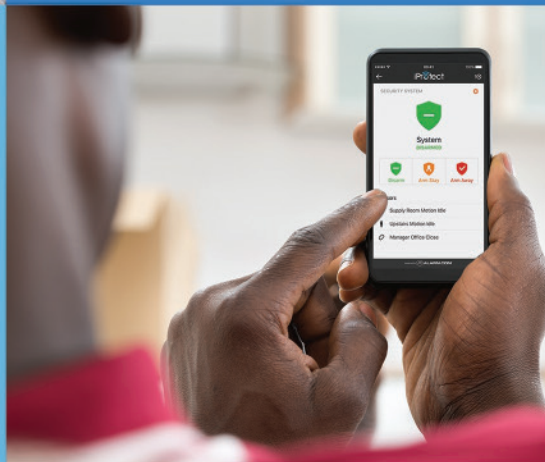

## Always keep an eye on your home

You can check on your home from wherever, whenever! Use the mobile app to see your cameras inside, outside or at your door/gate. If anything unexpected happens, you will be alerted in real-time on your phone so immediate action can be taken.

## Arm & Disarm your security system from anywhere, anytime

Conveniently arm & disarm your security system using your phone so you don't have to move a muscle or give your code to anyone else. Did the alarm go off? You will know first with an instant message that tells you where was triggered and your cameras can show you what set it off.

## Lock up your home & control lights with just a click

Did someone forget their keys? Now you don't have to be home to lock or unlock your doors, just do it from your phone! Coming home at night and want your lights on before getting inside? Going on vacation and want it to seem someone's home? All this can be done from a click of a button from anywhere.

## Never be a victim of disasters like fires, floods or water leaks

Fires are the most common household disasters and the faster you know is the better. Water leaks can result in high water bills, flood and household damage, now you can shut off the water remotely! Protect your investment with these instant alerts.
